

709A High Power Battery Spot Welding & Thermostatic Anti-static Soldering Machine

Features

- 1.It not only has the feature of spot welding and soldering tin, but also is very convenient and easy to use!
- 2.There are two methods of fixed spot welding and mobile spot welding, both of which are flexible to use.
- 3.Equipped with a 2/4/6/8 pulse welding number selection function, which provides reliable welding.
- 4.Fixed spot welding head pressure adjustment device, spot welding is more reliable.
- 5.Knob-type welding current regulator, current selection is fast and efficient.
- 6.Anti static constant temperature welding station with precise temperature control, suitable for any copper sheet and circuit welding.

Application

Lithium battery pack

Strain gauge

Stainless steel mesh

Circuit board

Button battery

Welding parameters

Power supply	AC 110V/220V±20V	Output power	3.2KW(Max.)	Welding current	50~800A
Welding thickness	0.05-0.35mm(Fixed head) / 0.05-0.2mm(Spot welding pen)				

Thermostatic soldering station parameters

Temperature of solder pen	150°C~450°C	Power of solder pen	50W	Time of temperature rising	Rise to 300 °C in 6-8s
The output voltage	DC 20V	Constant temperature accuracy	±5°C
